

1A LOW DROPOUT LINEAR REGULATOR

SCJA1117B-XXX-A

FEATURES

- Low Dropout Voltage: 1.3V at 0.8A Output Current
- Trimmed Current Limit
- On-Chip Thermal Shutdown
- Three-Terminal Adjustable or Fixed 1.2V, 1.8V, 2.5V, 3.3V, 5V
- Operation Junction Temperature: -20 °C to 125°C

GENERAL DESCRIPTION

The SCJA1117B-XXX-A is a series of low dropout three-terminal regulators with a dropout of 1.3V(typ.) at 1A output current.

The SCJA1117B-XXX-A series provides current limiting and thermal shutdown. Its circuit includes a trimmed bandage reference to assure output voltage accuracy to be within 2%. Current limit is trimmed to ensure specified. Output current and controlled short-circuit current. On-chip thermal shutdown provides protection against any combination of ambient temperature that would create excessive junction temperature.

The SCJA1117B-XXX-A has an adjustable version, that can provide the output voltage from 1.25V to 12V with only 2 external resistors.

APPLICATIONS

- PC Motherboard
- LCD Monitor
- Graphic Card
- DVD-Video Player
- NIC/Switch
- Telecom Modem
- ADSL Modem
- Printer and other peripheral Equipment

Marking:

A1117B = Device code
XXX: output voltage

MAXIMUM RATINGS

ORDERING INFORMATION

Package	Operating Junction Temperature Range	Part NO.
SOT-89-3L	-20 to 125°C	SCJA1117B-ADJ-A
		SCJA1117B-1.2-A
		SCJA1117B-1.8-A
		SCJA1117B-2.5-A
		SCJA1117B-3.3-A
		SCJA1117B-5.0-A

ABSOLUTE MAXIMUM RATINGS (T_a=25°C unless otherwise noted)

Parameter	Symbol	Value	Unit
Input Voltage	V _i	20	V
Thermal Resistance from Junction to Ambient	R _{θJA}	250	°C/W
Operating Ambient Temperature	T _A	-40~+85	°C
Operating Junction Temperature	T _J	-40~+150	°C
Storage Temperature	T _{stg}	-40~+150	°C
Lead Temperature (Soldering, 10s)	T _L	260	°C
ESD Rating	Human Body Model, HBM	8	kV

Note: Stresses greater than those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional of the device at these or any other conditions beyond those indicated under "Recommended Operating Conditions" is not implied. Exposure to "Absolute Maximum Ratings" for extended periods may affect device reliability.

RECOMMENDED OPERATING CONDITIONS

Parameter	Symbol	Value	Unit
Input Voltage	V _i	15	V
Operating Junction Temperature	T _J	-20~+125	°C

ELECTRICAL CHARACTERISTICS

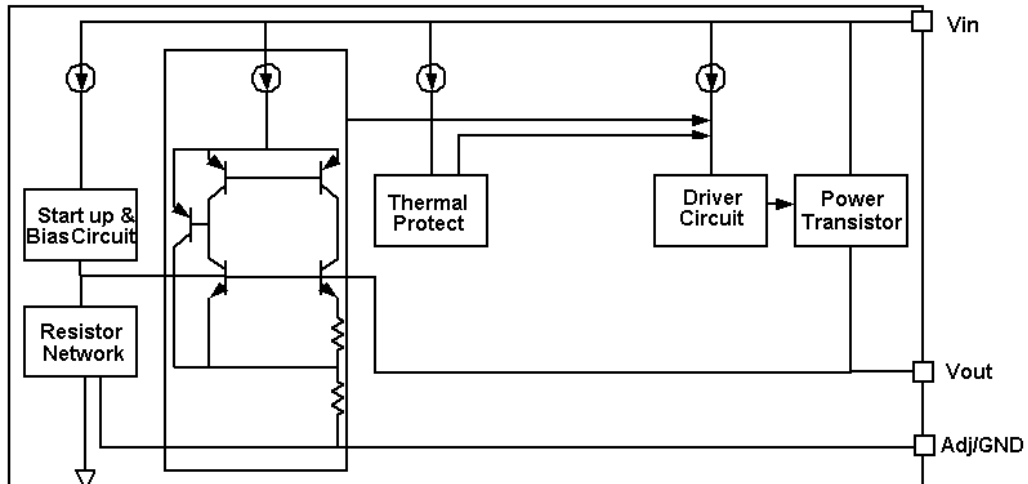

$T_J=25^{\circ}\text{C}$ unless otherwise specified.

* With package soldering to copper area over backside ground plane or internal power plane $R_{\theta JA}$ can vary from $46^{\circ}\text{C}/\text{W}$ to $>90^{\circ}\text{C}/\text{W}$ depending on mounting technique and the size of the copper area

FUNCTIONAL BLOCK and TYPICAL APPLICATION

FUNCTIONAL BLOCK DIAGRAM

DETAILED DESCRIPTION

SCJA1117B-XXX-A is a series of low dropout voltage, three terminal regulators. Its application circuit is very simple: the fixed version only needs two capacitors and the adjustable version only needs two resistors and two capacitors to work. It is composed of some modules including start-up circuit, bias circuit, bandgap, thermal shutdown, power transistors and its driver circuit and so on.

The thermal shut down modules can assure chip and its application system working safety when the junction temperature is larger than 140°C.

The bandgap module provides stable reference voltage, whose temperature coefficient is compensated by careful design considerations. The temperature coefficient is under 100 ppm/°C. And the accuracy of output voltage is guaranteed by trimming technique.

TYPICAL APPLICATION

Fixed Output Voltage Version

- 1) Recommend using 10uF tan capacitor as bypass capacitor (C1) for all application circuit.
- 2) Recommend using 10uF tan capacitor to assure circuit stability.

Adjustable Output Voltage Version

$$V_{OUT} = V_{REF} \times (1 + R2/R1) + I_{ADJ} \times R2$$

The output voltage of adjustable version follows the equation: $V_{out} = 1.25 \times (1 + R2/R1) + I_{Adj} \times R2$. We can ignore I_{Adj} because I_{Adj} (about 50µA) is much less than the current of $R1$ (about 2~10mA).

1) To meet the minimum load current (>10mA) requirement, $R1$ is recommended to be 125ohm or lower. As SCJA1117B-ADJ-A can keep itself stable at load current about 2mA, $R1$ is not allowed to be higher than 625ohm.

2) Using a bypass capacitor (C_{ADJ}) between the ADJ pin and ground can improve ripple rejection. This bypass capacitor prevents ripple from being amplified as the output voltage is increased. The impedance of C_{ADJ} should be less than $R1$ to prevent ripple from being amplified. As $R1$ is normally in the range of 100Ω~500Ω, the value of C_{ADJ} should satisfy this equation: $1/(2\pi \times f_{ripple} \times C_{ADJ}) < R1$.

THERMAL CONSIDERATION

We have to take heat dissipation into great consideration when output current or differential voltage of input and output voltage is large. Because in such cases, the power dissipation consumed by SCJA1117B-ADJ-A is very large. SCJA1117B-ADJ-A series uses SOT-223 package type and its thermal resistance is about 20°C/W. And the copper area of application board can affect the total thermal resistance. If copper area is 5cm*5cm (two sides), the resistance is about 30°C/W. So the total thermal resistance is about 20°C/W+30°C/W. We can decrease total thermal resistance by increasing copper area in application board. When there is no good heat dissipation copper are in PCB, the total thermal resistance will be as high as 120°C/W, then the power dissipation of SCJA1117B-ADJ-A could allow on itself is less than 1W. And furthermore, SCJA1117B-ADJ-A will work at junction temperature higher than 125°C under such condition and no lifetime is guaranteed.

SOT-89-3L Tape and Reel

SOT-89-3L Embossed Carrier Tape

Packaging Description:

SOT-89-3L parts are shipped in tape. The carrier tape is made from a dissipative (carbon filled) polycarbonate resin. The cover tape is a multilayer film (Heat Activated Adhesive in nature) primarily composed of polyester film, adhesive layer, sealant, and anti-static sprayed agent. These reeled parts in standard option are shipped with 1,000 units per 7" or 18.0 cm diameter reel. The reels are clear in color and is made of polystyrene plastic (anti-static coated).
